

Soprema Group danas je jedan od vodećih svjetskih proizvođača za proizvodnju materijala za pokrivanje bazena i vodonepropusne sustave, prisutna u preko 90 zemalja diljem svijeta.

FLAGPOOL pvc bazenske obloge zahvaljujući svojim visokim performansama i uvjetima hidroizolacije, mehaničke otpornosti, mekoće i fleksibilnosti dizajnirane su za vodonepropusnost, zaštitu i ukrašavanje bazena, rješenje za nove strukture i obnovu već postojećih. FLAGPOOL pvc bazenske obloge uvijek osiguravaju savršene estetske rezultate te su prikladne za svaki potporni element bazena: beton, prefabricirani beton, prefabriciran s metalnim pločama... Mogu se koristiti za pokrivanje privatnih ili javnih bazena kao i za vodene parkove. Glavne značajke su sljedeće:

- Visoka otpornost na atmosferske čimbenike te UV zrake
- velika otpornost na mikroorganizme
- visoka mehanička otpornost, otpornost na probijanje
- neosjetljivost na tople i hladne cikle
- odličan kapacitet zavarivanja
- otpornost na standardne kemikalije za obradu vode u bazenima

FLAGPOOL NG11 GLOSSY UNICOLOR PRINTED decorative borders version with SPECIAL LAQUERING FINISHING available in: Maiorca, Creta, Rodi, Minorca

The special LAQUERING on the visible surface of FLAGPOOL PVC liner ensures a better resistance to light, to the attack of any microorganism (funguses, bacteria, spores) and to sun creams and lotions. This allows reducing the cleaning interventions and prolongs the life of your swimming pool.

FLAGPOOL fully complies the European standard EN 15836-2/2010.

FLAGPOOL NG11 GLOSSY PRINTED unicolor 1.5mm thick liners made with reinforced glass fiber. Liner roll length 25m, height 17,2cm

THE CGT MEMBRANE ADVANTAGE

Our membranes are very robust which are resistant to scratches, chlorine, UV etc. We are a company with over 50 years of experience in the pool business.

All of CGT's products are varnished with multi-layer varnish, which makes them resistant to chlorine, UV, stains and color loss.

Our Aquasense patterns are unique in the market because of the quality and the realism of its emboss, the varnish we apply (also multi-layer) and the flexibility they have thanks to their 1.6mm thickness.

- **Premium PVC-P formula**
- **High quality multi-layer varnish**
- **Certification to NFP 15 836-1 and NFP 15 836-2**
- **Leading printing capability**

POROCELL BAZENSKI BLOKOVI

Prednosti bazena izrađenih od Porocell blokova :

Zbog svoje jednostavne metode i prilagodbe prikladni su za oblikovanje i izolacija neće biti potrebna. Blokovi koji čine sustav su izrađene od ekstrudiranog polistrena velike gustoće i mogu se rezati pilom ili 25 cm nožem .Svaka komponenta bazena, kao što su skimmer, mlaznica, protustrujna instalacija , lako se i precizno može integrirati. Ova fleksibilna obradivost omogućuje veliku slobodu stvaranja oblika bazena, prilagođavajući se njegovim dimenzijama.

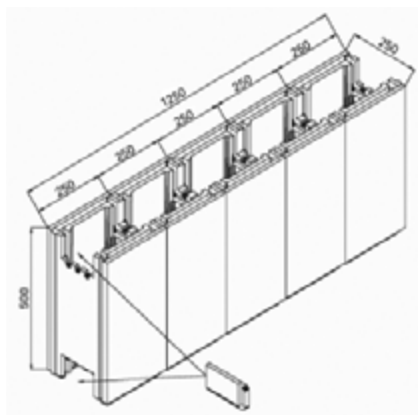

Na armirano-betonskoj podlozi postavljamo opeke koje čine sustav, potom se ojačavaju elementima za pojačanje i nadopunjuju s betonom . Sloj geotekstila postavljen je na zidove i na dno bazena. U slučaju da izolirate bazenske rubove s montažnom folijom, tada moramo fiksirati plastični profil koji omogućuje lako postavljanje bazenske folije . Ovi porocell blokovi pridonose bržem zagrijavanju vode u bazenu, tako da početak sezone kupanja može ranije početi i kasnije završiti. Blokovi koriste prirodnu sunčevu svjetlost kako bi zagrijali vodu. Kvaliteta bazenskih zidova može ovisiti o mnogim čimbenicima povezanim s promjenama temperature, kao što su napetosti ili efekti smrzavanja koji mogu uzrokovati oštećenja na zidovima bazena i unutarnje folije. Za razliku od tradicionalnih materijala, sustav Porocell sprečava oštećenja i upija napetosti.

Color	Category	Liner thickness
Standard handrail basic color: Adria blue	Basic	0.6 / 0.8 mm
Style handrail colors: Adria blue, Sand, Gray	Style	0.8 mm
Blue mosaic	Price quotation	0.8 mm

Depth	Wall thickness
90 cm	0,40 mm
120 cm	0,60 mm
135 / 150 cm	0,70 mm

- Both sides of the steel-wall has protective coating and galvanized. The inner shell is made of UV-stabilized PVC liner.
- The liner can be easily fixed by the corresponding profiles
- The aluminum profile enables quick and easy setup (no screw is needed).
- Due to the blue-style, aluminum-style and the sand-style edge, the liner is easily removable under the border.

* The STYLE hand rail's basic liner type is P1. (P3 type available upon individual design requests)

TOSCANA

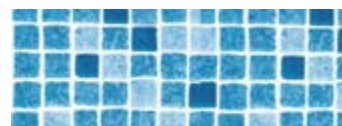

Adria blue

Sand

Gray

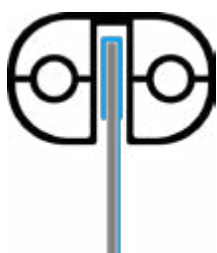

Blue mosaic

Color	Category	Liner thickness
Standard handrail basic color: Adria blue	Basic	0.6 / 0.8 mm
Style handrail colors: Adria blue, sand, gray	Style	0.8 mm
Blue mosaic	Price quotation	0.8 mm

Depth	Wall thickness
90 cm	0,40 mm
120 cm	0,60 mm
135 / 150 cm	0,70 mm

- Both sides of the steel-wall has protective coating and galvanized. The inner shell is made of UV-stabilized PVC liner.
- The liner can be easily fixed by the corresponding profiles
- The aluminum profile enables quick and easy setup (no screw is needed).
- Due to the blue-style, aluminum-style and the sand-style edge, the liner is easily removable under the border.

STANDARD HAND RAIL WITH P1 TYPE LINER

STYLE HAND RAIL WITH P1 OR P3*
