

SOLAR COVER, ROUND & OVAL

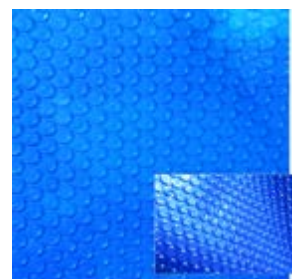

- UV stabilized polyethylene cover.
- Using solar blanket the pool water can be warmer up to 3-4°C. In case of solar blanket covered indoor pool the evaporation is significantly reduced so the operating time of the dehumidifiers will be reduced - and so energy can be saved.
- Thickness is 180 or 250 micron by round covers and 250 micron by oval covers.
- Expected life can be 2-3 years under mild chemical treatment.
