

SOLARNI TUŠ

Fantasy Rain

Solarni tuš je uređaj koji vam omogućuje zagrijavanje spremnika pomoću solarnog grijanja. Ovo alternativno grijanje ne uključuje financijske troškove. Samonosiva konstrukcija tuširanja služi kao spremnik za skupljanje vode i solarni kolektor koji koristi za izlaganje sunčevoj svjetlosti za zagrijavanje vode. To je sasvim ekološki prihvatljiv način za dobivanje vruće vode bez trošenja sredstava za grijanje. Solarni tuš se može koristiti od travnja do rujna, naravno, čak i duže u slučaju lijepog vremena. Preporučujemo da ga locirate u dijelu gdje sunce sjaji najveći dio dana dok je tuš zaštićen od vjetrova - na primjer, mjesto na sunčanom mjestu ispred živice ili zida. Time se smanjuje vrijeme potrebno za zagrijavanje vode. Volumen vode iznosi 35 litara, a visina je 215 cm. Uključuje bočni ventil za spajanje crijeva i metalnih sidrenih stopica. Ukupna težina je cca 15 kg.

Shower head

Mixing unit lever

Tap for cleaning feet

Outlet and input stopper
